

# REDINTEGRO

## **Environment & Sustainability Policy**

Redintegro Environmental provides independent training, auditing and consultancy services to waste producers and the waste and resource management industry.

We are committed to constantly evaluate environmental risks and opportunities, comply with all environmental legislation and ensure that all operations and services are delivered and managed in the most environmentally efficient way.

We will:

- Minimise waste produced by business activities prioritising waste avoidance and reuse first and recycling thereafter.
- Send no waste to landfill.
- Monitor purchasing practices to ensure best use of natural resources for longevity and recyclability.
- Comply with all relevant environmental legislation.
- Not carry out unnecessary travel and utilise other electronic methods of meeting and delivering training where appropriate and feasible.
- Minimise unnecessary use of energy and water through adoption of efficient practices.
- Educate and train others about environmental impacts and the effects of their activities.
- Monitor industry developments that can contribute to continual environmental improvements.
