REDINTEGRO

Waste & Resources Academy

INCLUDING CIWM | WasteSmart

Overview

Designed to support your business environmental, carbon & sustainability goals by providing a comprehensive immersion into waste & resource management. Supports **risk management, cost reductions, enhanced compliance, embedding of best practices & increased stakeholder engagement**. Delivered by subject matter experts with 30 years of industry experience. The course includes but goes beyond the **CIWM Waste Smart** course, providing **CIWM CPD Certified** content.

Format

- Delivered **on site** at your facility or at our sites (**online** delivery also available)
- 5.5 hour course (including breaks)
- Includes CIWM Waste Smart content and multiple choice test paper for CPD Certification upon passing
- **Ideal for** managers/supervisors of operational teams, facilities managers, HSE/sustainability teams & contractors

Typical Content

- Applying the waste hierarchy
- Obligations of all parties
- Environmental Impacts of waste management
- Costs of managing waste
- Waste routes & treatment technologies
- Legislative compliance
- Hazardous wastes
- Circular economy
- Sustainable best practices

Delegate Testimonials

"The waste sessions presented across our FM, Project and Specialist Services teams were a **superb insight** into legislation, compliance, risk management and gave our teams the **take-away knowledge and understanding** of many aspects of the waste industry. **Superbly presented**, encouraging **interaction and engagement** to challenge the audience and make us all **think differently** about this very important subject and our responsibilities in managing our waste" *Area Workplace Manager – UK wide Financial Services client.*

"Just a quick note to say thank you for the **amazing training session**, it was **fabulous** and **one of the best I have attended**. I have booked a waste audit for tomorrow and have some other great ideas from the course!"

"The motivation to attend this course stemmed from the fact that I would need to prove my **competence to lead ISO 14001 audits**. I believe the content covered more than satisfies this need"

"The course was **so well delivered** and the **content was very relevant** and **easy to understand**. I really am looking forward to implementing the knowledge I have taken away. I also feel I have been given the **tools and information to be confident** when managing waste, which I certainly wasn't confident on before"

"I thought it was good to see how the industry has moved on from just handling waste better to looking at **alternative ways of avoiding the generation of waste**. I found that very useful and interesting. Thanks for a **very useful course**"
