Delegate Testimonials

“The waste sessions presented across our FM, Project and Specialist Services teams were a **superb insight** into legislation, compliance, risk management and gave our teams the **take-away knowledge and understanding** of many aspects of the waste industry. **Superbly presented**, encouraging **interaction and engagement** to challenge the audience and make us all **think differently** about this very important subject and our responsibilities in managing our waste”

“Just a quick note to say thank you for the **amazing training session**, it was **fabulous** and **one of the best I have attended**. I have booked a waste audit for tomorrow and have some other great ideas from the course!”

“The motivation to attend this course stemmed from the fact that I would need to prove my **competence to lead ISO 14001 audits**. I believe the content covered more than satisfies this need”

“The course was **so well delivered** and the **content was very relevant** and **easy to understand**. I really am looking forward to implementing the knowledge I have taken away. I also feel I have been given the **tools and information to be confident** when managing waste, which I certainly wasn't confident on before”

“I thought it was good to see how the industry has moved on from just handling waste better to looking at **alternative ways of avoiding the generation of waste**. I found that very useful and interesting. Thanks for a **very useful course**”
